SUMMARY

As a junior web developer, I have determination to work and at least enthusiasm. As a fresher, I have at least a desire to learn and work. I have learned React.js, JavaScript, Express, MongoDB, Node.js, HTML, and CSS, I will learn more things in the future this is one of my goals. And with this goal, I want to partner with an organization, this organization will give me courage, support, and encourage me. And want to take this partner to the top of improvement. Finally, I want to be a reliable web developer, so that people can trust me, and I want to contribute something to this industry.

PROJECTS

1. TechBD - It's a online tech store based on E-commerce

Website

Work time 4 day | • React.js • JavaScript • Express.js • Node.js • Stripe

FEATURED

- First of all my website has a navbar with two routes named Home and Product.
- when a user goes to the product and goes to see the product details, he has to login, if he does not login, he will not be able to see the product details.
- I have admin and moderator routes
